

## JINYANG YAO

**Email:** jimmy123good@hotmail.com  
**Github:** <https://github.com/ailrk>  
**Blog:** <https://ailrk.github.io/home>  
**Contact:** +1 (250) 899 2600

### EDUCATION

The University of British Columbia, Kelowna, BC, Canada **2017-2021**  
Honours in Computer Science, minor in Mathematics. Average 85.9/100.

### PAST EXPERIENCES

- **2019 Summer:** Chongqing University HVAC department  
Participated the “Yangzi River area air conditioning and heating solution and its corresponding systems” project. Developed a program to select building designs that satisfies multi-objective constraints. Designed and implemented the project's web platform.
- **2020 -2021:** UBC computer science honor program.  
Using semi-supervised learning to assess programming assignments. Developed an iterative method allows human intervention to guide the algorithm to improve the clustering result.

### PERSONAL PROJECTS

**cppparsec** [github.com/ailrk/cppparsec](https://github.com/ailrk/cppparsec)  
A C++ monadic parser combinator inspired by Haskell's parsec library.

**tml** [github.com/ailrk/tml](https://github.com/ailrk/tml)  
Template meta language. A ml style functional programming language in C++ template.

**lambda cube** [github.com/ailrk/lambda-cube](https://github.com/ailrk/lambda-cube)  
A set of languages extended from the simply typed lambda calculus.

**pogger** [github.com/ailrk/pogger](https://github.com/ailrk/pogger)  
A partially R5S5 compliant scheme implementation in Haskell.

### SKILLS

- **Programming Language:** Mostly used: C++, Haskell, Python, Common lisp, Typescript. Worked with: C#, Java. Familiar with: Ocaml, SML, Rust
- **C++: 3 years** Familiar with the C++ memory model, template meta programming, generic programming and the implementation of the STL.
- **Haskell 2 years** Familiar with functional programming. Understand GHC compilation process and some GHC optimizations. Familiar with type level programming.
- **Python: 4 years** Familiar with flask web framework, sqlalchemy, and traditional machine learning algorithms with sklearn.
- **Typescript: 2 years:** Understand the structural typing system and some type level techniques. Familiar with libuv and event loop system. Understand reactor pattern. Experienced with React and nodeJS.
- **Compiler** Familiar with traditional compilation techniques, optimization and some program analysis. Familiar with various parsing techniques.
- **Math:** Minor in Mathematics. Linear Programming, Dynamic system, Number Theory, Abstract Algebra and their applications in error correction.
- **Language:** Have been living in **English** Speaking country for more than 3 years, received band 7 for IELTS in 2017. Native **Chinese** speaker. Learning **Japanese**.
